Innovación, Diseño y Tecnología

Alukler es la primera planta de su tipo en Paraguay y una de las más modernas de Sudamérica para la fabricación de perfiles de aluminio utilizados en diversos rubros, como construcción civil, mobiliarios, decoración, publicitarias, entre otros.

Con una planta electro intensiva, maquinaria europea de última generación y procesos industriales de vanguardia que posibilitan optimizar los tiempos de producción, logrando una excelente calidad y sobre todo oportunidades comerciales.

Nuestros Procesos

EXTRUSIÓN

- Materia prima: Aluminio de primera fundición de aleación 6063.
- Línea de extrusión automática de 7"/1800 T de procedencia italiana.
- Enfriamiento por aire.
- Templado categoría T-5
- Laboratorio de matricería con más de 800 matrices.
- Matrices de alto rendimiento con nitruración a gas.

ANODIZADO

- Buena resistencia a la corrosión atmosférica.
- Resistencia a la abrasión.
- Mayor dureza superficial.
- Mantiene el aspecto metálico del aluminio.
- Capa anódica de 5 a 20 micras de espesor de acuerdo a la especificación del cliente.

2013
Fundación de Alukler

7000 m²
De construcción

Matrices de extrusión

5
Líneas propias

800
Toneladas de capacidad de extrusión por mes

LACADO

- Excelente resistencia a la corrosión.
- Permanencia tanto del color como del brillo.
- Vida útil de hasta 25 años.
- Muy alta resistencia al amarillamiento.
- Certificado con norma europea Qualicoat.
- Tonalidades intensas, nítidas y sin apariencia plástica.
- Los acabados lacados no atraen suciedad.
- Facilidad de lavado y reparación superficial.
- Mayor elasticidad y flexibilidad para diseños con perfiles curvados.

EFECTO MADERA

- Pintura polvo sobre polvo.
- Efecto de veta realista al tacto.
- Para aplicación interior y exterior.
- Aplicable a todas las líneas de carpintería de aluminio.
- Mayor durabilidad y resistencia a la corrosión.
- No pierde el brillo y la coloración.
- No requiere mantenimiento como la madera.

El presente documento fué elaborado para que resulte fácil su comprensión, todos los perfiles en este catálogo se encuentra a escala real (1:1), las medidas están en milímetros (mm) excepto las que se especifican, como por ejemplo: "Momento de inercia" o "Momento resistente".

En este catalogo no se incluyen accesorios o nudos para fabricar las diversas tipologías que presentan cada línea. Si desea contar con dicha información favor consultar el catálogo de específico para cada línea.

212 Planta Industrial Ruta Alberdi Km 3 Yryvu Keha | Villeta, Paraguay | Oficina Corporativa: Pitiantuta 637, Zona Sur | Fernando de la Mora

Un grupo de empresas líderes dedicadas a la innovación en soluciones constructivas con estándares de calidad europea.

Alukler nace en 2013 situada en la ciudad de Villeta, con una construcción de más de 7000m², contando con maquinarias 90% automatizadas de última generación, disponiendo de 4 líneas propias con más de 800 matrices que permiten acabados de excelente calidad.

Es la primera planta industrial dedicada a la fabricación de perfiles de aluminio en Paraguay. El Grupo Costa decidió desarrollar el mercado de anodizado y extrusión de aluminio en el país, revolucionando el mismo a través de Alukler S.A.

Vilux nace en la ciudad de Encarnación en 1976 como un negocio familiar, hoy en día es la procesadora de vidrios más grande del Paraguay y líder del mercado nacional con su marca VILUX y en la provisión de soluciones de constructivas innovadoras con estándares de calidad europea.

Cuenta con 4 operaciones en puntos estratégicos del país, Fernando de la Mora, Encarnación, Minga Guazú y Pedro Juan Caballero en donde se encuentra el horno de templado de mayor envergadura de la región.

Transportadora TCC, compañía encargada del transporte de planchas de vidrio, perfiles de aluminio y materiales de construcción al exterior. TCC posee una flota de más de 50 camiones que brindan un servicio de logística sin igual.

Divetro es la empresa encargada de las inversiones inmobiliarias, el mantenimiento de la flota de vehículos y las maquinarias del Grupo Costa.
